LEADING MANUFACTURER OF SURFACE TREATMENT EQUIPMENT & TECHNOLOGY

AEROSPACE INDUSTRY

SURFACE TREATMENT EQUIPMENT

SANBLASTING CABINETS

ISTblast offers a wide range of sandblasting cabinets as well as custom-designed cabinets to achieve any industrial applications. Whether you want to clean, etch, sculpt, deburr, finish orpeen, we have a solution for all your surface preparation needs.

AUTOMATED SYSTEMS

We design and manufacture custom pneumatic blast systems to allow automation, consistency and reliability in the blasting process of parts and components for the aerospace industry.

ABRASIVE BLAST ROOM

ISTblast is a North American leader in the field of design, fabrication, and installation of abrasive blast rooms. We have designed as many different blast room configurations as there are process challenges that our clients wanted to overcome. The only thing they have in common is their ability to save substantially on their production costs and abrasive purchases.

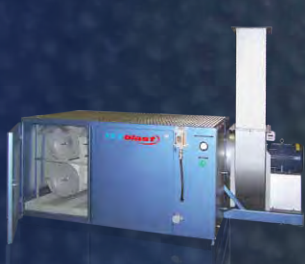

DOWNDRAFT TABLES

Industrial self-cleaning Downdraft Table helps eliminate smoke dust and fumes right from the source of production, keeping your workers breathing zone safe and breathable during grinding, welding and painting operations.

VIBRATORY TUBS

Vibratory Tubs are used for finishing mid to large size parts, typically for deburring, fine finishing, polishing, burnishing or radiusing, and can generate specific finish requirements such as pre-plate finishes. Several parts can be treated at once by using optional dividers.

ULTRASONIC PARTS WASHERS

ISTpure's ultrasonic cleaning technology is a powerful and eco-friendly solution to clean and restore parts in a variety of shapes and sizes, including hard-to-reach blind holes and cavities, in minutes using simply tap water or specialty soaps.

SPRAY GUN CLEANERS

ISTpure's Spray Gun Cleaners are versatile and durable systems designed for in-depth cleaning of all type of spray gun equipment in seconds. All cleaners have ergonomic working heights and are suitable for both solvent and/or waterborne paint equipment.

SOLVENT RECYCLERS

On-site Solvent Recycling Systems are a cost-effective solution for safely recycling solvents and other hazardous chemicals from your industrial processes. Our systems are easy-to-use, require low maintenance, and are built with robust and corrosion-free stainless steel tank.

INDUSTRIAL PARTS WASHERS

ISTpure offers a wide range of standard and custom parts cleaning solutions using tap water aqueous technologies, tap water or solvents-based cleaning solutions designed for any applications.

ABOUT THE COMPANY

WHO WE ARE

Since 1978, IST is a leading industrial manufacturer of standard and custom engineered equipment for the manufacturing industry.

MISSION

IST is dedicated to being an innovative and trusted supplier in the conception, fabrication and distribution of surface treatment equipment, industrial parts washers and chemical recycling equipment.

TRADEMARKS

SANDBLASTING EQUIPMENTS AND SUPPLIES

CUSTOM AND AUTOMATED SOLUTIONS

INDUSTRIAL PARTS WASHERS AND SOLVENT RECOVERY SYSTEMS

ENGINEERING SERVICES

- Custom built design & fabrication
- Multidisciplinary engineering expertise in mechanical, electrical, and automation & control
- Technical expertise in blasting process development and solvent recycling
- Installation, maintenance, repair, and on the road service teams
- Emergency technical support 24/7
- Startup & training seminars for users and maintenance teams
- Contract manufacturing & private labels
