

BAG-HOUSE DUST COLLECTOR **MODEL DC100**

The model DC100 dust collector is a very cost-effective filtration system designed for heavy-duty use and is efficient at preventing dust from escaping into the work environment and contaminating surround machines and work surfaces.

It is very affordable and provide superior filtration capabilities compared to DC50 model.

The DC100 is the appropriate solution for dust capture and filtration of various applications

The DC100 is modular, pneumatic shaker type, dust collectors requiring minimal supervision and maintenance.

FEATURES

- ✓ Dust collector features an energy-saving air-filtration system capturing 99,5 % of all particles three (3) microns or larger.
- ✓ Bags-type dust collectors standard, offering improved efficiency and durability
- ✓ No explosion-proof devices required

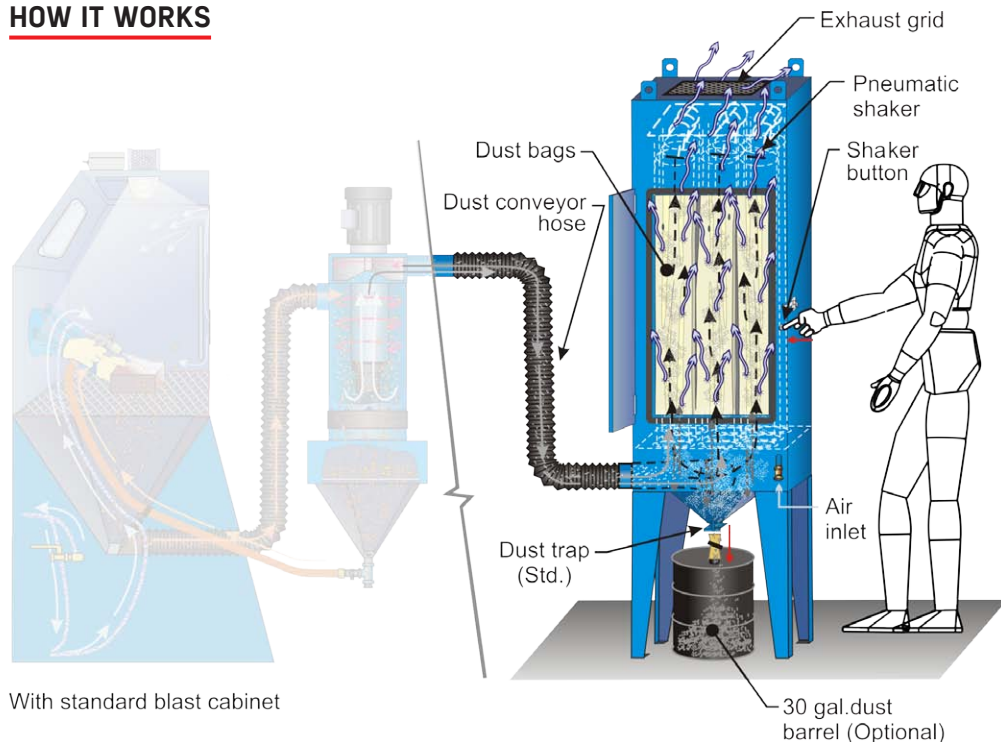

MARKETS

- General manufacturing
- Aerospace and aviation
- Marine
- Automotive
- Petroleum
- Power & energy
- Pharmaceutical

- ✓ Barrel dust outlet with trap door (optional)
- ✓ Ease of access to the filter bags
- ✓ Replacement bags are readily available
- ✓ Can be operated with either pressure or suction sandblasting cabinets.
- ✓ QPS approved in Canada and the U.S.

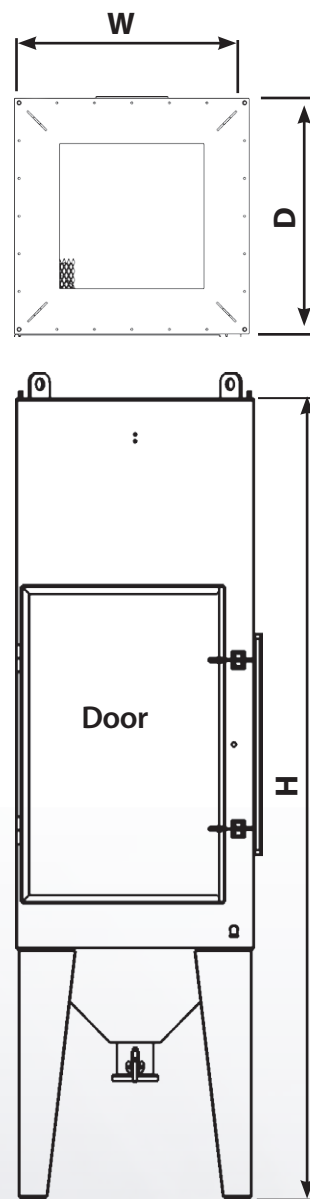

No other dust collector on the market today offers the many practical benefits included on a ISTblast dust collector as standard equipment. Just look at the features. The standard components in a ISTblast system have been carefully designed for safety, ease of operation, reduced maintenance and increased productivity.

HOW IT WORKS

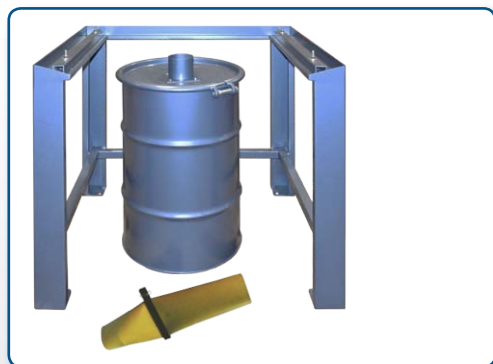

With standard blast cabinet

FLOOR LAYOUT

AVAILABLE OPTION

Extension feet and 30 gal barrel

SPECIFICATIONS

Description	Value
Model number	625025
Filter Area (square feet)	100
Weight (lb.)	400
Overall dim's (D x W)	28" x 28"
Overall height (H)	103"
Door opening (W x H)	23" x 35"
