

SUCTION CABINET ECONOBLAST SERIE 26-28-48

OPTION SECURITY DOOR OPENING WITH TIMER

Figure A

Figure B

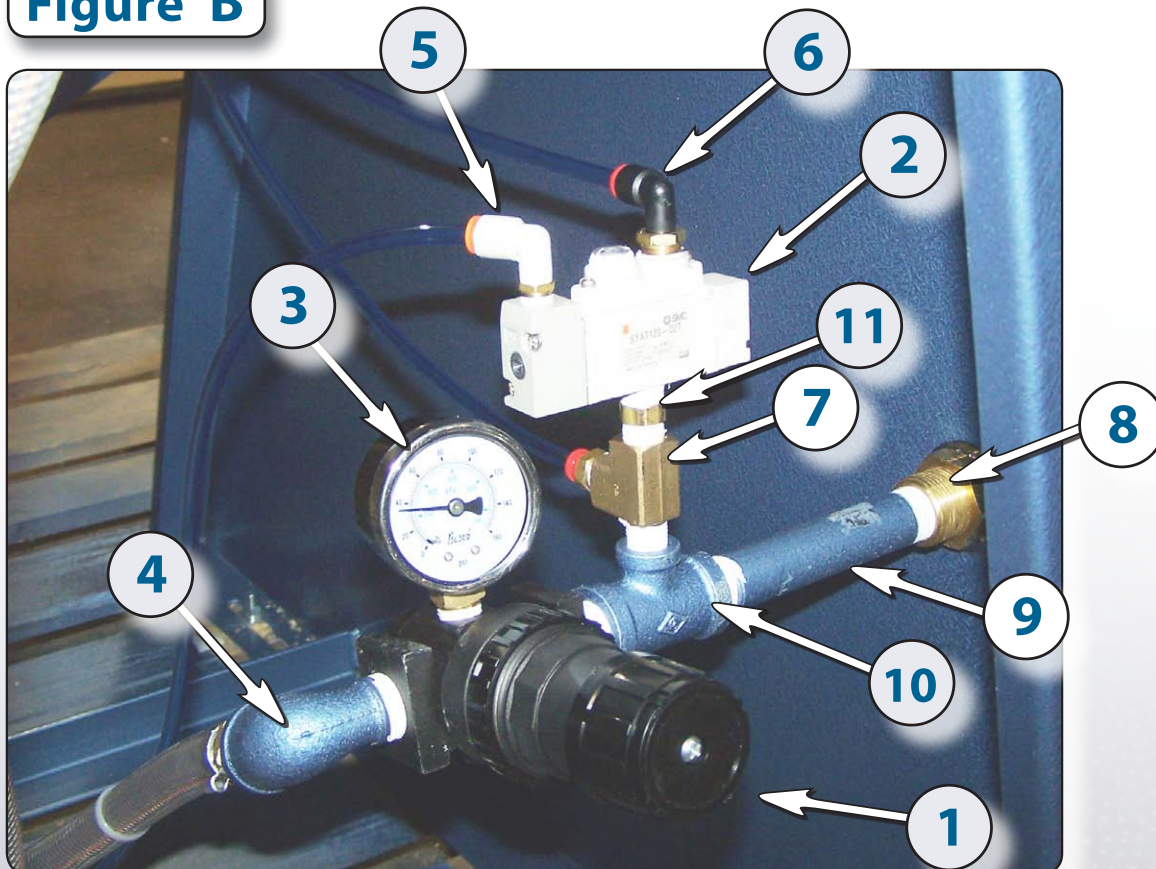

FIGURE C

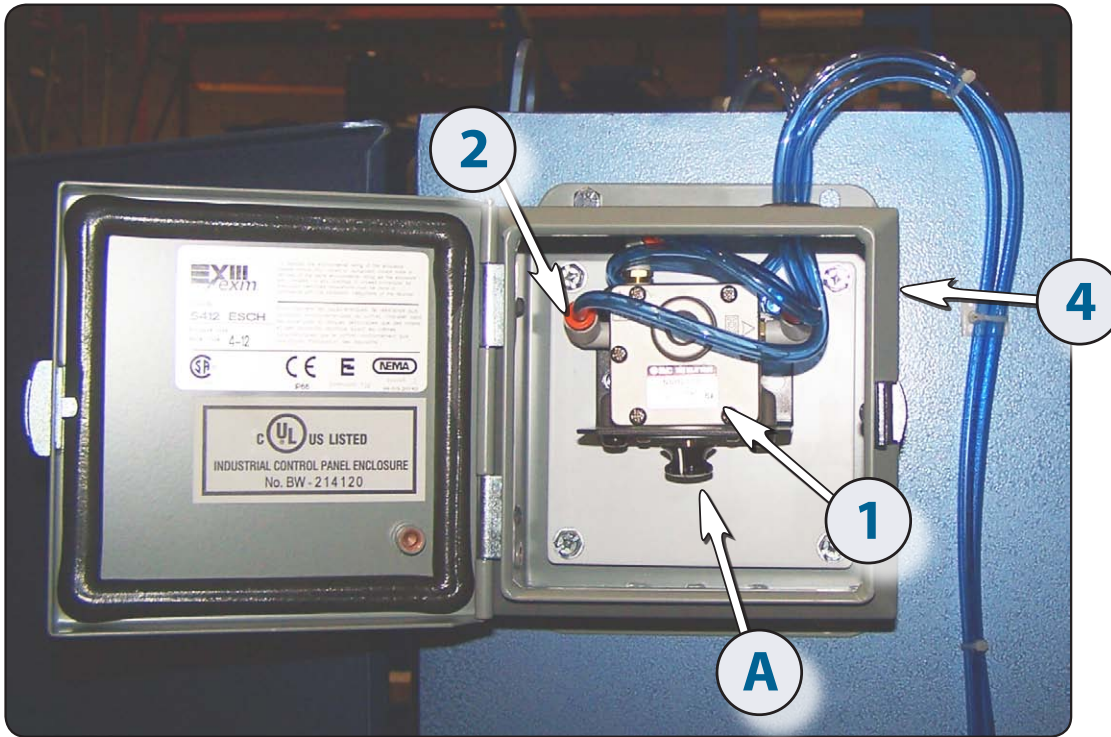

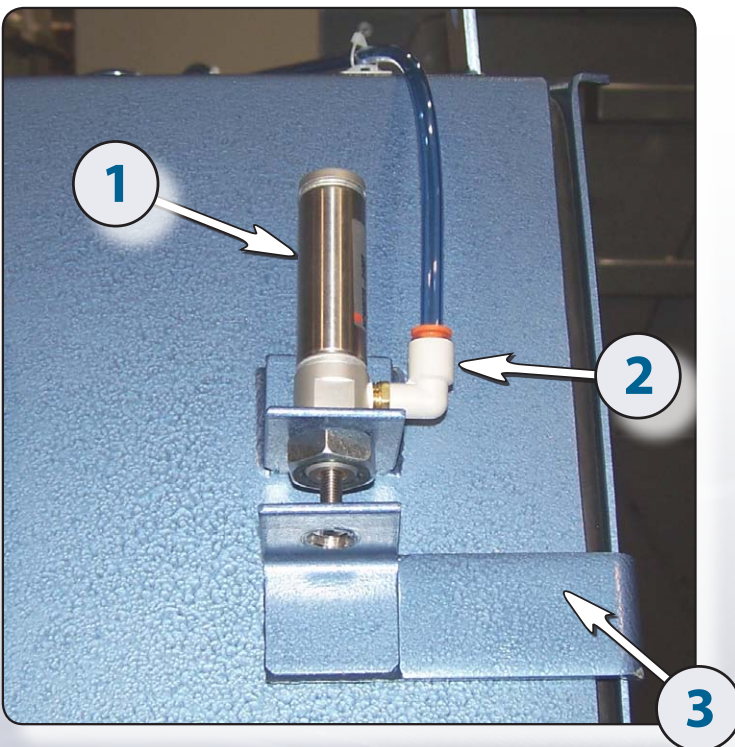

FIGURE D

Operation :

The timer is adjustable by turning the knob (A) fig. C. When the pedal is depressed, the piston blocks the opening of the door. When the pedal is released, the piston withdraws after a period of time (depending on the timer), allowing the opening of the door.

OUR MAP LOCATION

ABOUT THE COMPANY

WHO WE ARE

IST is a leading manufacturer of equipment for the surface treatment industry and the solvent recycling industry. Our extensive line of equipment includes batch units and automated machines designed to achieve the highest manufacturing standards.

MISSION

IST works tightly with their customers to transform industrial processes to improve their quality, productivity, and environmental footprint.

OUR SERVICES

- Custom Design & Fabrication
- Installation & Startup
- Preventative Maintenance Program
- Private Labels
- Testing Lab
- 24/7 Technical Support

INDUSTRIES WE SERVE

- Aerospace & Aviation
- Aluminium Smelters
- Automotive
- Construction & Civil Engineering
- Flexography (labelling) & Lithography
- Foundry & Forge
- General Manufacturing
- Military
- Power & Energy
- Rail & Mass Transit
- Shipyards
- Wood finishing
